1	Introduction	1
1.1	Student research in Human Geography and Spatial Planning	1
1.2	Research objective and questions	3
1.3	Thesis structure	4
2	Theoretical Background	5
2.1	Semantic Representation of Knowledge	5
2.2	Information extraction and Entity Linking	6
3	Methodology	8
3.1	Knowledge modeling	8
3.1.1	Knowledge graphs and ontologies	8
3.1.2	Ontology engineering methodology	9
3.2	Data sources and preparation	13
3.2.1	Archive	14
3.2.2	Annotation procedure	14
3.2.3	Inter-annotator agreement analysis	14
3.2.4	Data cleaning and annotation guidelines	16
3.3	Entity Extraction	17
3.3.1	Task structure and model selection	18
3.3.2	Model evaluation strategy	19
3.3.3	Extraction model for semantically unambiguous labels	21
3.3.4	Extraction model for semantically ambiguous labels	22
3.4	Entity Linking	23
3.4.1	Linking of <i>subject</i> entities	23
3.4.2	Linking of <i>spatial</i> entities	24
4	Results	25
4.1	Evaluation results	25
4.1.1	Extraction results	25
4.1.2	Entity linking results	26
4.2	SGLP Thesis Knowledge Graph creation	27
4.3	Answers to competency questions	27
5	Discussion	37
5.1	Findings	37
6	References	41
A	Original Annotation Guidelines	44
B	Gemini System Prompts	45
B.1	Semantically unambiguous Entities Extraction	45
