Mr. J. J. Sterkenburg
Barendstraat 20
Boskoop
Holland.

Dear Mr. Sterkenburg,

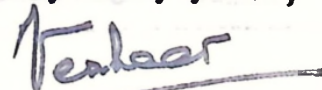

Your letter of July 7, 1963 to Mr. Spangler has been referred to me for a reply.

Your paper "De bevolking's rubbercultuur in Liberia" was indeed received here some time ago and has been on my desk ever since. It contains a wealth of information that, in many cases, would be difficult to obtain elsewhere. In regard to Liberian purchased rubber we still have a number of problems to cope with and your paper gives the kind of information that can help us in our considerations of these problems. I would therefore like to congratulate you on a job well done.

Unfortunately, since it is written in Dutch, only a few would be able to read it; translating 70 large pages of fine print would be quite an undertaking and I don't know whether there will be an opportunity to do this. However, your second paper: Labor supply and labor productivity in Liberia, would be as welcome as your first and I do hope you will send us a copy. This can be done by boat mail or, if you want to play it safe, by requesting a Dutch staff member returning from leave to carry it, perhaps through the good services of Mr. Blomsma, Africa Institute, The Hague.

With best personal regards,

Very truly yours,

Dr. G. Verhaar,
Director of Research.
