ACKNOWLEDGEMENTS

This Thesis has been written as part of an ERASMUS student exchange program between the University of Utrecht, the Netherlands and Middlesex University, London, the United Kingdom. I am extremely grateful to all those who have assisted me in undertaking this research. Special thanks goes to my supervisor S. Pile of Middlesex University, who guided me in the right direction. I would like to thank the London Docklands Development Corporation for their assistance. Finally, I must thank all those who provided me with information by interviews or in an other way.

London, June 1994
